Subject: Re: MEW 5 Year Review Sampling

Thanks. One other question, for the PCB in groundwater analysis, do you want totals only, or do you also want filtered samples. I assumed total only, but just wanted to check.

We will submit a QAPP which is standard for our contract, as with the START contract as well. It is really a hybrid QAPP/SAP. Maybe a little different than you are used to seeing but standard for what we submit for sampling efforts and EPA QA review. Anyways, after we submit and you get a chance to review, if you need additional info, please let me know.

Jeff –

The previous fish sampling was whole fish. EPA method 8082 and lipid analyses were performed. I'll try to find you another map; MW-5 is very close to MW-3.

Subject: MEW 5 Year Review Sampling

Pauletta,

I am working to complete the QAPP for the 5 Year Review sampling at MEW. Question for fish tissue, are you wanting whole fish analysis or just fillet analysis? Fillet would be more specific for human consumption. Also, can you email another figure showing the monitoring wells at the site, the one that accompanied our TO doesn't specifically show the location of MW-5 (I think it is covered by some other icons). That would help finalize our sample location map.

Thanks,
